**ABSTRACT OF THE DISCLOSURE**

~~Integrated variable optical attenuator and isolator,~~  
~~components therefor and method of assembly~~

An integrated variable optical attenuator and isolator assembly includes:  
a variable optical attenuator including a polarisation rotation medium (504),  
an optical isolator including an optical rotator (208),  
and  
a polariser (506) interposed between the polarisation rotation medium (504) and the optical rotator (208),  
whereby said polariser (506) is common to both the variable optical attenuator and the optical isolator.
